Coloursmith Reader Quick Start Guide

Welcome to your Coloursmith Reader

With this nifty device you'll soon be on your way to capturing and creating colours you love. Whether you want to match an existing colour in your home—or capture colour from an object, image or surface—it couldn't be easier.

You're only a few steps away... so, let's get started!

---

1. Download and Launch

– Grab your smartphone and download the Coloursmith™ app through the App Store or Google Play.

– Sign up or sign in with your email address or social media account.

Download on the **App Store**

GET IT ON **Google Play**

2. Connect and Calibrate

– Select 'Create from Match' then 'Connect Device'.

– Remove the cap, press the Wake button on the base of the Reader. The LED indicator will begin to flash.

– Once your smartphone finds the Reader (should only take a few seconds) the light will flash quickly. Press the Wake button again to confirm the connection.

– Select 'Calibrate' in the Coloursmith app and follow the in-app instructions.

– You're ready to go!

Quick Tips

If you experience any problems with the app, simply delete and re-install.

If you experience any problems during connection, simply reset the Reader by holding down the Wake button for 15 seconds.

Low battery level might affect the accuracy of the colour match.

3. Capture and Create

– Place the Reader directly onto the colour you want to capture and select 'Match'.

– Confirm the details of your captured colour.

– Give your colour a name. After all, you created it!

Quick Tip
Keep your reader in tip–top shape by keeping the calibration tile safe and clean, and not leaving the battery fully discharged for long periods of time.

Congratulations, you're now a bona fide Coloursmith!

Don't forget, with the Coloursmith app and Reader you can capture, create and name as many colours as you like. We can't wait to see what you do with them.
