

How to— Coloursmith Reader

When only the best will do, there's no better colour creation tool than the Coloursmith Reader. Providing pin-point precision, the Reader combines an LED light source with a tri-stimulus XYZ sensor to provide superior colour matching accuracy.

And it's oh-so-easy to use...

Step 1
Download the Coloursmith app through the App Store or Google Play, then sign up or sign in with your email address or social media account.

Step 2
Select 'Create from Capture'... then 'Connect Coloursmith Reader'... and follow the instructions.

Step 3
Remove the cap and calibrate the Reader by placing it on the calibration tile and pressing the button.

Step 4
Capture your colour. Place the Reader directly onto the colour you want to capture and press the button... the app will do the rest!

Step 5
Confirm the details of your captured colour. Don't forget to give it a name!

Step 6
Order your sample paint pot delivery and try out your colour. Then take your QR code to a Bunnings, Bristol or Taubmans store to pick up your paint and make your space your own!
