

# How to— Coloursmith Window

The Coloursmith Window is small—but mighty. When used in combination with the Coloursmith app it greatly increases the colour accuracy captured from any object, image or surface.

And it's oh-so-easy to use...

#### Step 1

Download the Coloursmith app through the App Store or Google Play, then sign up or sign in with your email address or social media account.

#### Step 2

Select 'Create from Capture'... then 'Use Coloursmith Window'... and follow the instructions.

#### Step 3

Place the Window flat, directly onto the colour you want to capture.

#### Step 4

Capture your colour. Centre your smartphone camera over the Window and take a photo... the app will do the rest!

#### Step 5

Confirm the details of your captured colour. Don't forget to give it a name!

#### Step 6

Order your sample paint pot delivery and try out your colour. Then take your QR code to a Bunnings, Bristol or Taubmans store to pick up your paint and make your space your own!
